Per assemblare cime ad una o più luci su pali Alti, aggiungere al bracciale l'adeguata coppia di snodi **Garden**, in funzione del diametro del palo. Sono realizzati in ottone fuso e brunito. Verniciatura acrilica trasparente essiccata a forno.

To connect tops with one or more lights on High poles, choose the Sconces and add the suitable couple of **Garden** joints, according to the diameter of the pole and brackets. They are produced in bur-nished cast brass, with furnace-dried transparent acrylic varnishing.
